

## 42<sup>nd</sup> Annual Convention and Exhibition

## Pet Wellness

All the information you need is at the Total Health Show this year!

The Total Health Show (12-14 April, Metro Toronto Convention Centre) is proud to announce another extraordinary line-up of some of the most respected international experts in the natural health field.

A highlight this year is <u>Dr. Marlene Siegel</u>, DVM who will discuss the top three contributors to cancer in animals, and practical tips to reduce the risks of disease in pets.

<u>Dr. Siegel</u> is an integrated veterinarian in Tampa Fla. She has been blending the best of eastern medicine with western medicine for over 20 years. Her experience in healing Lilly (her horse) led Dr Siegel to acquire the widest array of alternative skills and tools, and it is now her mission to re-define veterinary health care by educating pet parents on strategies, tools and products available to ensure their pets live the longest, healthiest life possible.

## She can discuss:

- Digestion and gut health
- Species appropriate diet
- How to feed and your pets to ensure that they get all the essential nutrients
- How to heal the gut and detoxify all the organs of elimination
- Methods for repairing and restoring mitochondria

In addition to the packed trade show floor, featuring over 200 exhibits devoted to a natural healthy lifestyle, and a gourmet, organic food area, 60 keynote speakers will present updated information on attaining peak health to the tens of thousands of Torontonians for whom the Total Health Show has become a must-attend event each year.

The Total Health Show is North America's premier natural health show, bringing cuttingedge knowledge to Canadians from the leading innovators in the natural health field for 42 years. Over 15,000 visitors each year attend the show to sample exciting new products, participate in debates, and meet leading innovators in the field.
