## *New Information on Dangerous Chemicals in Food*

**The 41<sup>st</sup> Total Health Show (11-13 May, Metro Toronto Convention Centre)**

is proud to announce another extraordinary line-up of some of the most respected international experts in the natural health field. In addition to the packed trade show floor, featuring over 200 exhibits devoted to a natural healthy lifestyle, and a gourmet, organic food area, 60 keynote speakers will present updated information on attaining peak health to the tens of thousands of Torontonians for whom the Total Health Show has become a must-attend event each year.

One of the highlights this year will be **Jeffrey M. Smith** who is available to discuss this latest news: <https://www.theguardian.com/us-news/2018/apr/30/fda-weedkiller-glyphosate-in-food-internal-emails>

**Jeffrey M. Smith** is an internationally bestselling author and filmmaker, Executive Director of the Institute of Responsible Technology, and a leading spokesperson on the health dangers of GMOs. His meticulous research documents how biotech companies continue to mislead legislators and safety officials, and how the safety assessments conducted by the FDA and regulators worldwide are built upon outdated science and false assumptions, putting the health of society at risk and the environment in peril. His feature-length documentary *Genetic Roulette, The Gamble of Our Lives* links genetically engineered food to toxic and allergic reactions, infertility, digestive disorders, and numerous problems that have been on the rise since (GMOs) were introduced. Smith will be participating in a panel at the Total Health Show on *Holistic Health for the Whole Family: How Non-GMO Organic Diets Can Improve Health* and will discuss his new film *Secret Ingredients*.

**[Jeffrey Smith](#) is available for comment and interview**

**[The Total Health Show](#)** is N. America's premier natural health show, bringing cutting-edge knowledge to Canadians from the leading innovators in the natural health field. Thousands of visitors visit the show each year, to sample new products, participate in debates, and meet leading innovators in the field.
